Questions of online crime are as complex and interconnected as the Internet itself. With each episode in The Internet Police, Anderson shows the dark side of online spaces—but also how dystopian a fully "ordered" alternative would be. Includes an afterword that details law enforcement's dramatic seizure of the online black market Silk Road.

Cyber / online crime | The Crown Prosecution Service

In The Internet Police, Ars Technica deputy editor Nate Anderson takes readers on a behind-the-screens tour of landmark cybercrime cases, revealing how criminals continue to find digital and legal loopholes even as police hurry to cinch them closed. From the Cleveland man whose "natural male enhancement" pill inadvertently protected the privacy of your e-mail to the Russian spam king who ended up in a Milwaukee jail to the Australian arrest that ultimately led to the breakup of the largest ...

The Internet Police: How Crime Went Online, and the Cops ...

Police often break cyber crime down into two categories: Cyber enabled crime – traditional crimes committed using the internet. e.g. theft, harassment, fraud, identity theft, selling stolen goods, drug dealing or people smuggling. Cyber dependent crime - online crimes where a digital system is the target. These include attacks on computer systems to disrupt IT infrastructures, e.g. unauthorised access (hacking), malicious software programming (malware) or denial of service.

Here is what some of our police partners say about us: " The abuse and exploitation of children over the internet is an abhorrent crime. The scale and complexity of offending means that this is a problem that law enforcement agencies cannot tackle alone and the support of our partners is vital.

How we work with the police | Internet Watch Foundation

Crime has become very sophisticated as some criminals make use of the very latest technology. To handle this, the police have developed equally sophisticated methods of crime detection and prevention. Legislation has also been updated to allow the police to gather evidence on criminal activity carried out via the internet, for example. Information is the key word in crime detection and this information must be accurate and easily available.
