As the fundamental functions of the artery are to serve as a conduit of blood flow and as a container of blood pressure, Vascular Mechanics and Pathology describes both the general principles and the occurrence of stress concentration at the pressure vessel junctions and examines the role of beta-blockers in the reduction of atherosclerosis and related complications. This cutting-edge work presents the use of veins as arterial grafts and discusses the role of vein valves in graft stenosis.

Vascular Mechanics And Pathology [EBOOK]

Opening new doors for interdisciplinary research, Vascular Mechanics and Pathology establishes a correlation between vascular mechanics and pathology that could lead to the reduction of vascular diseases, as well as the development of new treatments. Vascular Mechanics and Pathology focuses on the artery and arterial diseases.

In recent years, the mechanisms and clinical significance of vascular calcification have been increasingly investigated. For over a century, however, pathologists have recognized that vascular calcification is a form of heterotopic ossification. In this review, we aim to describe the pathology and m

Vascular Pathology . Overview; Whatever their etiology and pathogenesis, most vascular disorders cause clinical disease due to either inappropriate narrowing of the vascular lumen or pathological thinning of the vascular wall. Luminal narrowing can lead to downstream tissue ischemia while pathological thinning makes the vasculature prone to ...

Vascular Mechanics and Pathology: Thubrikar, Mano J ...
The endothelial barrier maintains vascular and tissue homeostasis and modulates many physiological processes, such as angiogenesis. Vascular barrier integrity can be disrupted by a variety of soluble permeability factors, and changes in barrier function can exacerbate tissue damage during disease progression. Understanding endothelial barrier function is critical for vascular homeostasis. Many ...

Vascular dementia is one of the most common causes of dementia after Alzheimer's disease, causing around 15% of cases. However, unlike Alzheimer's disease, there are no licensed treatments for vascular dementia. Progress in the specialty has been difficult because of uncertainties over disease classification and diagnostic criteria, controversy over the exact nature of the relation between ...
