"Vision Science: Photons to Phenomenology" by Stephen E Palmer, MIT Press, Cambridge, Massachusetts, 1999. At 810 pages, this is a phenomenally encyclopaedic book. However, due justice to the grand title - "Photons to Phenomenology" - would by necessity take several volumes this size.

Vision Science: Photons to Phenomenology: 9780262161831 ...

Vision science is the scientific study of vision. Vision science encompasses all studies of vision, such as how human and non-human organisms process visual information, how conscious visual perception works in humans, how to exploit visual perception for effective communication, and how artificial systems can do the same tasks. Vision science overlaps with or encompasses disciplines such as ...
