This volume contains the Proceedings of the International Symposium on Computing in Object-Oriented Parallel Environments (ISCOPE '98), held at Santa Fe, New Mexico, USA on December 8-11, 1998. ISCOPE is in its second year, and continues to grow both in attendance and in the diversity of the subjects covered. ISCOPE'97 and its predecessor conferences focused more narrowly on scientific computing in the high-performance arena. ISCOPE '98 retains this emphasis, but has broadened to include discrete-event simulation, mobile computing, and web-based metacomputing. The ISCOPE '98 Program Committee received 39 submissions, and accepted 10 (26%) as Regular Papers, based on their excellent content, maturity of development, and likelihood for widespread interest. These 10 are divided into three technical categories. Applications: The first paper describes an approach to simulating advanced nuclear power reactor designs that incorporates multiple local solution methods and a natural extension to parallel execution. The second paper discusses a Time Warp simulation kernel that is highly configurable and portable. The third gives an account of the development of software for simulating high-intensity charged particle beams in linear particle accelerators, based on the POOMA framework, that shows performance considerably better than an HPF version, along with good parallel speedup.

Choices can change everything. As a Neeth Nymph in the world of Enchanted Breeds, Echoe Sweetcharm has acting in her blood. For her, however, this calling is blocked by her grandpatch and family patriarch, Allonzo, who tries to turn her chair into her curse. Despite him, she forges on, building her career as a writer and director, staying close to her dream. After Allonzo's passing, the stage pulls her once more, and she makes one more attempt to grasp her dream on the center-stage, auditioning for 'The Next Heartbeat'. Soon, however, she truly feels cursed, as accidents place her life inexplicably into greater danger. But her grandpatch can't really have anything to do with this, can he...? Just what in the world is going on?

Unavailable for almost 20 years, a little-known Dr. Seuss book about careers gets a fresh new look! Wildly imaginative and told in rollicking rhyme, this beginning reader about careers could ONLY have been written by Dr. Seuss! Featuring a mix of real jobs (like firefighter, doctor, teacher, farmer, etc.) and Seussian ones (including perfume smeller, fishbone boner, bass-drum banger, and roller coaster owner), it will incite plenty of giggles while planting the seed of a serious idea: that everyone needs to do something in life, and there are LOTS of choices! Fully illustrated with charming new art (featuring a multicultural cast in nontraditional gender roles), this is a great choice for home and classroom use! Launched in 1957 with *The Cat in the Hat* and written specifically for emergent readers, Beginner Books combine an exacting blend of simple words and fun pictures that encourage children to read--all by themselves.

Joey has a dog. And a ball. And a great throwing arm. Jet has Joey. And a job to do. And do. And do. And do. They make a fine pair. If you were Joey's ball -- the one with the blue stripe -- you would keep moving among the birds through the trees on the water down the hill up the hill across the street between the tables over the roofs into a hole and out of a hole along with Jet, Joey's dog.
