Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and "get tough" pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. Juvenile Crime, Juvenile Justice presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents--trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance--the probability that delinquency or criminal activities decrease with age--and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? Juvenile Crime, Juvenile Justice presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

The authors of the 20 chapters in Juvenile Crime and Justice address various hotly debated topics along three loosely connected themes: prevention, prosecution, and corrections. Each author presents arguments both in favor of and opposed to various treatments, programs, and punishments, examining issues such as youth curfews, juveniles in adult courts, legal representation for juveniles, juvenile boot camps, group homes, out-of-home placement, and more. The chapters included cover the leading arguments pertaining to key topics in this field and point out where more research needs to be done/which, at present, includes many of the most controversial issues in juvenile justice policy. The Series The five brief, issues-based books in SAGE Reference's Key Issues in Crime & Punishment Series offer examinations of controversial programs, practices, problems or issues from varied perspectives. Volumes correspond to the five central subfields in the Criminal Justice curriculum: Crime & Criminal Behavior, Policing, The Courts, Corrections, and Juvenile Justice. Each volume consists of approximately 20 chapters offering succinct pro/con examinations, and Recommended Readings conclude each chapter, highlighting different approaches to or perspectives on the issue at hand. As a set, these volumes provide perfect reference support for students writing position papers in undergraduate courses spanning the Criminal Justice curriculum. Each title is approximately 350 pages in length.

There is an impasse in current thinking about youth crime and justice, represented by punitive and harmful practices, and liberal objections to these processes on the other, based predominantly on arguments for [rehabilitation]. This book aims to arrive at an alternative strategy for resolving the tensions between young people [i](#) especially those on and beyond the margins [i](#) and the social world which frames their lives. The book is split into three sections: Part 1 focuses on young people, their attitudes and behaviour; Part 2 considers the way in which their behaviour is constructed as criminal and then addressed; Part 3 considers the limitations of current practices and potential alternatives. Within this broad framework, the differentiated and contested nature of young people's experiences and our (and their) ideas of /youth/ can be counterposed to prevailing one-sided and often discriminatory assumptions about them; in order then to open up questions about the nature and purposes of the youth justice system, and to introduce some possibilities for reconstructing it according to fundamental principles of rights, welfare and social justice. Doing Justice to Young People will be essential reading for anybody working in or studying youth crime and youth justice.

The Second Edition of this best-selling text provides a fully revised and up-to-date critical analysis of a wide range of issues surrounding young people, disorder and crime. How and why have certain aspects of young people's behaviour come to be perceived as 'anti-social' and 'criminal'? Are young people now more of a threat than ever before? How can we make sense of New Labour's youth justice reforms? Is the youth justice system soft on crime? Are young people more in need of protection than disciplinary punishment? To develop a comprehensive criminology of youth the book deliberately moves.
